Welcome

Dear Colleagues,

Once again, it is time for the annual meeting of ESG, an ongoing tradition since 2001. Established in the year 2000 by Professors Mohamed Ibrahim and Nabil Sabry together with a prestigious group of glaucoma specialists of Egypt, ESG was the first Glaucoma Society in the Middle East and Africa, and has become an outstanding regional society. Its meetings have been successfully ongoing since the first year in the millennium, with no interruption.

The organizing committee has arranged for a rich scientific content spanning 3 days; Wednesday is set exclusively for basic to advanced instruction courses. Thursday and Friday are packed with various format scientific sessions. We are privileged to have an eminent guest speaker; Dr Paul Harasymowycz head of the glaucoma section at the Université de Montréal, Canada, together with some of the best glaucomatologists in the country, who will share their vast experience with ESG members.

I would like to acknowledge the fruitful contributions of the industry who supported this meeting, with special thanks to Novartis, the platinum sponsor. All made substantial efforts for its success. On behalf of the ESG Board, I invite you to make your active participation in the meeting, and wish you a fruitful outcome out of its 3-day activities.

A handwritten signature in black ink, appearing to read 'Ahmad Khalil', written over a thin horizontal line.

President of ESG
Ahmad K Khalil, MD, PhD

We Save the Eye

 **Orchidia**
Pharmaceutical Ind.
Excellence in Quality

Dorzolamol

Dorzolamide 2% / Timolol 0.5%

LONG LASTING EFFICACY IN IOP CONTROL

Provides 50% reduction for IOP>30 mmHg

Consistent & maintained IOP - lowering effect.

Effective add-on therapy to Latanoprost.

High safety profile.

Favorable tolerability.

DOSAGE:

Instill one drop in the affected eye(s) twice daily⁸.

COMPOSITION: Each 1.00 ml contains: Dorzolamide hydrochloride 22.26 mg (equivalent to 20 mg Dorzolamide) Timolol maleate 6.83 mg (equivalent to 5 mg Timolol) **THERAPEUTIC CLASS:** DORZOLAMOL ophthalmic solution (dorzolamide hydrochloride and timolol maleate), is the first combination of a topical carbonic anhydrase inhibitor and a topical beta-adrenergic receptor blocking agent. **INDICATIONS:** DORZOLAMOL is indicated in the treatment of elevated intraocular pressure (IOP) in patients with open-angle glaucoma, pseudoexfoliative glaucoma or ocular hypertension when topical beta-blocker monotherapy is not sufficient. **DOSAGE & ADMINISTRATION:** - The dose is one drop of DORZOLAMOL in affected eye(s) two times daily. When substituting DORZOLAMOL for another ophthalmic antiglaucoma agent(s), discontinue the other agent(s) after proper dosing on one day, and start DORZOLAMOL on the next day if another topical ophthalmic agent is being used. DORZOLAMOL and the other agent should be administered at least ten minutes apart. **CONTRAINDICATIONS:** DORZOLAMOL is contraindicated in patients with -Bronchial asthma or a history of bronchial asthma, or severe chronic obstructive pulmonary disease. -Sinus bradycardia, second or third degree atrioventricular block, overt cardiac failure, cardiogenic shock. -Hypersensitivity to any component of this product. The above are based on the components and are not unique to the combination. **WARNINGS & PRECAUTIONS:** Cardiovascular/Respiratory Reactions: -As with other topically-applied ophthalmic agents, this drug may be absorbed systemically. -The timolol component is a beta-blocker. Therefore, the same types of adverse reactions found with systemic administration of beta-blockers may occur with topical administration, including worsening of Prinzmetal's angina, worsening of severe peripheral and central circulatory disorders and hypotension. -Because of the timolol maleate component, cardiac failure should be ad- watched for and pulse rates should be checked - Respiratory reactions and equally controlled before beginning therapy with DORZOLAMOL. In patients with a history of severe cardiac disease, signs of cardiac failure should be cardiac reactions, including death due to bron- chospasm in patients with asthma and rarely death in association with cardiac failure, have been reported following administration of timolol maleate. Hepatic Impairment: - DORZOLA- MOL has not been studied in patients with hepatic impairment and should therefore be used with caution in such sulphonamides. Therefore, the same types w. Immunology and Hypersensitivity: - As with other topically-applied ophthal- u is drug may be absorbed systemically. mic agents, this systemic administration of sulfonamides may occur with topical administra- tion, including severe reactions such as Stevens-Johnson syndrome and toxic epidermal necrolysis. If signs of serious reactions or hypersensitivity occur, discontinue use of this preparation. -Local ocular adverse effects, similar to those observed with dorzolamide hydrochloride eye drops, have been seen with DORZOLAMOL. If such reactions occur, discontinuation of DORZOLAMOL should be considered. -While taking (5-blockers, patients with a history of atopy or a history of severe anaphylactic reaction to a variety of allergens may be more reactive to accidental, diagnostic, or therapeutic repeated challenge with such allergens. Such patients may be unresponsive to the usual doses of epinephrine used to treat anaphylactic reactions. Concomitant Therapy: The following concomitant medication is not recommended: - Dorzolamide and oral carbonic anhydrase inhibitors. -Topical beta-adrenergic blocking agents. Withdrawal of Therapy: - As with systemic beta-blockers, if discontinuation of ophthalmic timolol is needed in patients with coronary heart disease, therapy should be withdrawn gradually. Additional Effects of Beta-Blockade: - Therapy with beta-blockers may mask certain symptoms of hypoglycaemia in patients with diabetes mellitus or hypoglycaemia. -Therapy with beta-blockers may mask certain symptoms of hyperthyroidism. Abrupt withdrawal of beta-blockers therapy may precipitate a worsening of symptoms. -Therapy with beta-blockers may aggravate symptoms of myasthenia gravis. Additional Effects of Carbonic Anhydrase Inhibition - Therapy with oral carbonic anhydrase inhibitors has been associated with urolithiasis as a result of acid-base disturbances, especially in patients with a prior history of renal calculi. Although no acid-base disturbances have been observed with dorzolamide/timolol. Because DORZOLAMOL contains a topical carbonic anhydrase inhibitor be at increased

8- Insert leaflet.

SPEAKERS INSTRUCTIONS..

Congress halls will be equipped with:

Two laptops: one Apple Mac & one PC with Microsoft Windows 8 and Microsoft Office 2013. Internet access will NOT be available inside the meeting rooms.

To ensure that the meeting progresses smoothly, please stick to the following instructions:

All presentations should be recorded on a USB flash memory (preferred).

- Please save presentations in PowerPoint 2007 or later format for PC & Keynote for Apple.
- Upload your presentation early to the Audiovisual Center (RM Events) as we will load the presentations to the hard drive of our systems before the sessions by one hour.
- No personal laptops are permitted for presentations.
- In case you have problems with your presentation(s), please do not hesitate to contact the IT support team (RM Events).

THURSDAY

19 October, 2017

08:00 - 16:00 | Registration

09:05 - 09:10 | Opening remark: Ahmad Khalil

09:10 - 11:20 | I. Symposium: Diagnosis of Glaucoma

Chairpersons: Tharwat Mokbel, Zeinab El Sanabary, Adel Abdel Shafik

09:10	Vision-related quality of life in glaucoma patients in Alexandria	<i>AbdelRahman Husseiny</i>
09:20	Glaucoma screening	<i>Tarek el Bromboly</i>
09:30	IOP and beyond	<i>Tharwat Mokbel</i>
09:40	Assessment of IOP using ORA and GAT before and after PKP	<i>Amr Wassef</i>
09:50	Detection of preperimetric glaucoma	<i>Shaymaa Hassan</i>
10:00	Optic disc. Are you glaucomatous?	<i>Amir Abu Samra</i>
10:10	Evolution of quantitative assessment of RNFL in glaucoma	<i>Tarek Eid</i>
10:20	Is OCT useful in glaucoma management?	<i>Adel AbdelShafik</i>
10:30	Pearls in OCT imaging in glaucoma	<i>Paul Harasymowycz</i>
10:40	Is there a role for OCT angiography?	<i>Zeinab El Sanabary</i>
10:55	Colour vision deficiency in glaucoma	<i>Moustafa Nassar</i>
11:05	Discussion	

THURSDAY

19 October, 2017

11:20 - 11:40 | PROFESSOR MI ABDALLAH LECTURE

MIGS: Enhancing patient outcomes

Paul Harasymowycz

11:40 - 13:00 | II. Symposium Management of Glaucoma

Chairpersons: Hoda El Sobky, Moustafa Nassar, Laila Hammouda

11:40	Control of IOP in cases of anterior segment reconstruction	<i>AbdelHamid El Hofy</i>
11:55	Reserving the power of the optic nerve	<i>Moustafa Nassar</i>
12:05	Glaucoma and refractive surgery	<i>Mohamed ElMallah</i>
12:15	Management of Angle Closure Glaucoma	<i>Paul Harasymowycz</i>
12:30	Glaucoma was the clue: a clinical case report	<i>Riham Samy</i>
12:40	Transscleral cyclophotocoagulation using diode laser 980 nm	<i>Amr Abdel Rahim</i>
12:50	Discussion	

13:00 - 13:30 | COFFEE BREAK

THURSDAY

19 October, 2017

13:30 - 14:00 | Novartis Sponsored Lecture

Glaucoma from theory to practice

Paul Harasymowycz

14:00 - 14:10 | Obituary

In memory of Professor Fawzy El Shiaty

Ahmed I. Abouleinin

14:10 - 15:30 | III. Symposium: Secondary Glaucomas

Chairpersons: Taha Labib, Tarek El Emary, Saad Rashad

14:10	Exfoliation: the Nature and Effect	<i>Ahmad Khalil</i>
14:25	Uveitic glaucoma...an update	<i>Eiman Abd El Latif</i>
14:35	IOP changes in uveitic patients...practical signs	<i>Eiman Abd El Latif</i>
14:45	Glaucoma and PKP	<i>Taha Labib</i>
15:00	Pediatric aphakic glaucoma	<i>Yasmine El Sayed</i>
15:15	Management of chronic angle closure glaucoma due to microspherophakia	<i>Yasser Ali Hamed</i>

THURSDAY

19 October, 2017

15:30 - 17:00 | IV. Panel Discussion: Difficult situations in childhood glaucoma

Moderator: Nader Bayoumi

Panelists: Ahmad Hossam, Hala El Hilali, Ahmad Khalil, Yasmine El Sayed

Redo surgery in PCG

Glaucoma in Sturge Weber

Glaucoma in microphthalmia-microcornea aphakic eyes

Glaucoma in anterior segment dysgenesis

Childhood glaucoma in the Omics era

17:00 | DINNER

FRIDAY

20 October, 2017

08:30 - 14:00 | Registration

09:20 - 10:50 | V. Panel Discussion: Posterior Segment and Glaucoma

Moderator: Ahmed I. Abouleinin

Panelists: Hassan Eissa, Ahmed Mostafa, Farid Wagdy, Heba Magdy

10:50 - 11:40 | VI. Symposium: Glaucoma Surgery 1

Chairpersons: Adel Farag, Tarek El Beltagi, Said Shalaby

10:50	Trabeculectomy with Ologen compared to trabeculectomy with MMC in JOAG.	<i>Heba Magdy</i>
11:00	Overhanging bleb	<i>Said Shalaby</i>
11:10	The conjunctiva: a friend or foe: video presentation	<i>Riham Samy</i>
11:20	Trabeculectomy in case of Sturge Weber Syndrome	<i>Yasser Ali Hamed</i>
11:30	Surgical closure of cyclodialysis cleft	<i>Tarek Eid</i>

11:40 - 13:30 | PRAYER+ COFFEE BREAK

13:30 - 14:00 | Pfizer Sponsored Lecture

Normal Tension Glaucoma

Adel AbdelShafik

FRIDAY

20 October, 2017

14:00 - 15:20 | VII. Symposium: Glaucoma Surgery 2

Chairpersons: Ali Khalifa, Tarek Aboulnasr, Khaled Mourad

14:00	Could lens extraction be the new treatment option for PACG?	<i>Tarek Aboulnasr</i>
14:15	Baerveldt implant versus Ahmed valve in management of difficult glaucoma cases	<i>Khaled Hamdy</i>
14:25	Management of corneal oedema due to peripheral corneal touch	<i>Yasser Ali Hamed</i>
14:35	El Saadani Glaucoma Tube implant(EGTI): a novel patent	<i>Abdel Khalik Elsaadani</i>
14:45	Third flap technique in viscocanalostomy	<i>Khaled M.Hassan</i>
14:55	Modified deep sclerectomy	<i>Mohamed El Mallah</i>
15:05	Express glaucoma shunt	<i>Ahmed Hossam</i>
15:15	Discussion	

15:20 - 16:50 | VIII. Interactive Session: Glaucoma Management

Moderators: Ahmed I. Abouleinin, Adel AbdelShafik, Ayman El Shiaty

Topics to be discussed with audience using voting system:

- Methods of examination
- Visual field
- OCT
- Glaucoma cases

16:50 - 17:15 | Closing remarks and prizes

17:30 | DINNER

(dorzolamide HCl-timolol maleate
